This course **is worth every cent I paid!!!** Thank you very much Vertabelo for such amazing course. I learned a lot. Also, thank you very much for free SQL Function course.

Now when I have backbone of SQL Queries I feel very confident to start reading some Beginner/Intermediate SQL book.

Looking forward to new courses.

So far the best course for me.

I had no prior knowledge of databases and now I'm following step by step and learning with ease. Straightforward steps. No jumping around. Awesome !!!

To Whom It May Concern,

My name is Lyle Adams, and I am on the Core Data team at Uber. At a high level, we are looking for to develop interactive SQL training modules for our employees. We would like these training materials to be customized and interactive with examples which people here at Uber can identify with.

Is this something you can provide? If so, can you please let me know the best time to connect?

Cheers,
Lyle
